MINING, BUSINESS AND STOCKS.

ROY COMPANY MAKES **EXCELLENT SHOWING**

Uncovers Some High Grade Gold, Silver, Lead and Copper Ore in Clifton Mining District.

(Special to The News.) Provo, Jan. 13.-Frank H. Millet of the Provo Bench, president of the Roy Mining & Milling company, operating in the Clifton mining district in the Deep Creek country, has just received some very encouraging news from the property. From the assays made, Mr Millet has a record that promises on of the best mines in the famous dis-

From a vein that outcrops on the surface assay returns were \$8 in gold, from 1 to 3 per cent copper and some lead to the ton. A shaft sunk on the vein brought returns of \$18 in gold, 5 per cent copper, 17 ounces in silver and 1 per cent lead. When the shaft reached a depth of 25 feet the vein showed \$60 in gold, 1 per cent lead, 10 ounces in silver and 6 per cent copper. This vein is declared to be two feet wide at that depth. Alongside of this is a 4-foot vein of low grade ore in which the returns on the assays made show two ounces in silver, 5 per cent copper, and small values in gold to the ton.

But little development work has been done on the property, which consists of 12 claims, situated close to the Midas and other promising properties of the Deep Creek country. The indications are that a good property can be opened up with energetic development work and to that end considerable treasury stock is being disposed of in this vicinity.

Jesse Knight, who is well acquainted From a vein that outcrops on the sur

Jesse Knight, who is well acquainted with the conditions in the vicinity of the property, has become interested and will assist in opening up the property which the management believes will develop into a large mine.

Mr. Millet declares that conditions are very promising all through the Deep Creek country and mining men from Ely and points in Nevada and Utah are being attracted to the district. The greatest drawback to the country at present is the distance from a railroad. This will undoubtedly be overcome in

greatest drawback to the country at present is the distance from a railroad. This will undoubtedly be overcome in a few years by a line through that country from Salt Lake to Ely.

The officers and directors of the company are: Frank H. Millet, president; John H. Stratton, vice president; Don C. Clayton, secretary and treasurer; Walter Cox and Paul A. Millet, directors. The company is capitalized for \$55,000, with shares at 5 cents each. At the time of the incorporation about a year ago 500,000 shares were placed in the treasury.

ALL STOCKS ARE LOWER.

Absence of Dividends Has Effect on Local Stock Market.

Local Stock Market.

The failure of the Tintic companies to pay dividends for January is undoubtedly the cause of all stock being off today. For several days it has been noticeable, but various feature stocks kept up the interest. Today the market was featured on the downward side and the stocks slid lower. All were nervous and unsteady.

Columbus Consolidated is again on the list of victims although it recovered slightly before the close of the market. It opened at 95 cents and under heavy selling climbed up to \$1.07\frac{1}{2}\$. Grand Central was a little stronger today but still very weak as compared with the first of the week. Iron Blossom went at 73 cents and Mason Valley dropped to \$2.25. Although there was a strong market in Tintic Central it did not tring the price of yesterday. In all \$500 shares were disposed of today at from \$4\frac{1}{2}\$ to 10 cents.

The total number of shares sold today was 40,375 and the amount represented by the transactions was \$17,-086.25.

Opex was the feature of the curb

Open was the feature of the curb market and the best price it has reached in a year was made today. The stock sold as follows: 200 shares at 75 cents; 300 shares at 70 cents; 500 shares at 75 cents; 500 shares at 75 cents. The only other stock that sold on the market was 1,500 shares of Greenhorn at 31-3 cents.

WILSON CONSOLIDATED

STRIKES BISMUTH ORE

Good Ledge of Rock Found in Gray

Eagle Group of Claims in Clifton

Mining District.

Considerable work was done on the

been in excellent copper ore for the past 15 feet. This ore also averages about \$4 in gold. Some fine copper ore is also being taken out of the Iron Duke group.

MAJESTIC IS IMPROVING.

MAJESTIC IS IMPROVING.

The Boston office of the Majestic Mines company is in receipt of a wire this morning from Manager A. D. Moffat stating that the shaft is down 16 feet, and that rock is getting softer so that progress will improve, says the Boston Financial News. He states a record will be made in sinking the shaft. Mr. Moffat also states that the water is giving no trouble whatever, and that all conditions are growing more favorable as the work progresses. The total depth of shaft is now 530 feet. The next station will be cut at depth of 600 feet. The force will then be added to and rapid work done to block out the ore between the 500 and 600 foot levels.

CONCENTRATES. A. E. Hodges of Pioche returned to the camp yesterday after spending a week in Salt Lake.

M. J. Dalley, superintendent of the Silver King Coalition Mines company at Park City, is in Salt Lake today.

F. G. Janney of the Utah Copper company has returned from Los An-geles where he went to visit his family.

Walter C. Orem, manager of the Nevada Copper belt rallroad running into Yerington is expected to return from that district the latter part of the

By Buying Mines.

The Boston Financial News is in a position to give the latest plan for the consolidation of the Cole-Ryan and Amalgamated Copper properties. The plan has been formulated by the J. P. Morgan interests and is entirely different from any plans heretofore considered, says the paper of Jan. 5.

The plan is to form a new company which will offer to buy the properties and not the shares, of the various Cole-Ryan and Amalgamated operating companies and to pay for such properties either with cash or stock in the new company. erties either with cash or stock in the new company.

The properties thus far mentioned as being taken into the new company are the Anaconda, Butte & Boston, Boston & Montana and the Parrot. Others will doubtless be considered later such as the North Butte, Butte Coalition and other Cole-Ryan companies, but nothing definite has yet been done other than to consider the selling of the Amalgamated properties to the new company.

The Amalgamated Copper company will take the nav for the stock in the selling of the stock in the selling of the Amalgamated Copper company.

Bismuth bearing rock, containing considerable gold has just been found on the Gray Eagle group of the Wilson Consolidated property near Clifton, according to Frank Wilson, manager of the property, who has just returned after several weeks spent in the Deep Creek country. Although no assay has been made of the ore it contains gold which will probably average \$18 and better a ton and from 5 to 10 per cent bismuth.

Considerable work was done on the

THESE FIGURES ARE STUPENDOUS

Salt Lake Clearing House Ass'n Holds Annual Election and Makes Wonderful Showing

bismuth.

Considerable work was done on the group of claims about 12 years ago by Herman Bress and Charles Sandquist. They sunk a shaft for about 20 feet and took out in the neighborhood of 75 tons of ore carrying an average of \$18 in gold. Last summer a deal was made to take this property over from Bress and Sandquist. When Mr. Wilson went to the district early in December he put men to work on the property digging an open cut down the side of the hill from the old incline shaft. The cut was run in but a little way before the vein was encountered. Work was pushed along the vein for 25 feet and some excellent samples were taken out.

The ledge was found to be about four and a half feet wide, the ore making in a lime spar formation. The face of the cut and the shaft are about 25 feet apart so that the ore has been developed for a distance of about 70 feet. In the cut a chunk that weighed in the neighborhood of a ton was broken off. The rock pans well. The work in the shaft shows the former owners worked under the ore body. On the Tin Cup group of claims belonging to the same company and about a mile north of the Gray Eagle, the shaft which is down 55 feet has been in excellent copper ore for the past 15 feet. This ore also averages This morning the annual meeting of the members of the Salt Lake Clearing House association, which comprises practically all the banks of the city, was held. In accordance with the rules of the association, the officers are appointed by rotation, and Mr. McCornick, president of the Utah National, retired in favor of L. S. Hills, president of the Deseret National. Mr. McCornick, as head of McCornick & Co., now became vice president. S. A. Whitney of McCornick & Co. retired as secretary and treasurer in favor of L. H. Farnsworth of Walker Bros.' bank. The old executive committee was re-elected, consisting of W. S. McCornick, L. S. Hills, C. S. Burton, Frank Knox, and L. H. Farnsworth.

R. R. Sharkey of the Continental National, who has been manager of the Clearing House for the past year, is succeeded by John T. Boud of the Utan Commercial & Savings bank. The retiring manager in his report says.

The bank clearings reached a total of \$337,493,362.68, an increase of \$80,459.
388,36 over last year, the largest clearings and the greatest increase for any one year in the history of the association. This can be accounted for to a certain extent by the great bullding activity we are enjoying, the increased mining operations, and the large and successful crops of every description, all of which created check circulation, thus increasing the clearings." House association, which comprises

WOOL.

PRODUCE. Chicago, Jan. 13.—Scattered commission house buying here today gave an up-

ward trend to the wheat prices in the early trading. The opening range on futures was from \(^1\) to \(^4\), the bullishness being based to some extent on foreign cables telling of a strong market in Liverpool. Another factor was the strength in the corn pit, where yesterday's davance was repeated. May opened \(^4\)\(^4\) to \(^4\)\(^4\) higher than yesterday's final figures at 1.13\(^4\) to 1.13\(^4\). Later it sold up to 1.13\(^4\). Later it sold up to 1.13\(^4\). A rush of traders to the corn pit at the opening of the session boosted prices to crop record-making points at the outset, May touching 70\(^4\). July 69\(^4\) and September 69\(^4\). The opening range was from \(^4\), to \(^4\) higher than yesterday's close and in the first hour prices kept within the starting figures.

Profit-taking sales by longs counterbalanced the extra demand caused by the unusual weather and kept the market from running away. The opening figures for May were 69\(^4\) to 70\(^4\).

Light offerings in the oats pit together with a good demand and with the strength of corn contributed to an advance at the outset, opening figures ranging \(^4\) to \(^4\) higher than yesterday's final quotations. In the first hour trading was practically within the opening range at the start May sold at 48\(^4\) to \(^4\) higher than yesterday's lose.

Wheat—The market remained bullish until near the close when it weakened under liberal selling. May sold off from 1.4\(^4\) to 1.13\(^4\) and closed weak, unchanged at 1.13\(^4\

WEEKLY MARKET LETTER.

WEEKLY MARKET LETTER.

(Special Correspondence.)

Kansas City Stockyards, Jan. 10.—
Cattle receipts last week were about
3.000 head, and the market made a net
gain of 10 to 20 cents, after numerous
incutuations. The run today is 17,000
head here, and fairly liberal elsewhere,
the liberal supply drawn out by the
good market last week partly, and also
helped by the desire of feeders in native territory to get rid of their holdings. The heavy receipts of short fed
attle lately lead to the belief in stronger prices later in the season, and the
man who sticks may win out again this
season, as has been the case for two
or three years past. The market is
weak to 10 lower today, a moderate decline in the face of such a large supply. Trade in range cattle during the
past week has been without feature, except that a few good Colorado beef
steers have been here at 5.25 to 5.75, and
Colorado cows at 4.25 to 5.00. Bulk of
the fed steers here today sell at 5.25
to 6.50, top steers today 7.40, bulk of
cows at 3.60 to 4.75, best cows 5.25, best
heifers 6.00, bulls at 3.25 to 5.10, cholce
veals 8.00 to 9.00, heavy calves around
5.50. The belief in better fat cattle
prices later in the season is stimulating
trade in feeders, and the fact that half
the winter is gone is an incentive to
the purchase of stock cattle, which
makes trade in country grades very
good, and prices at the high point of
the winter, and considered extra high
for this season of the year. Stock steers
sell at 3.40 to 5.00, feeders 4.25 to 5.25,
with selected feeders up to 5.90 during
the past week.

Thirty-eight thousand sheep and
lambs arrived last week, but the market made a good gain during the week,
and closed up firm. Run is 12,000 today, market steady to 10 lower, although the Ronssee lambs, westerns fed
in Kansas, sold at 8.60 today, same as
on different days last week, and ewes
reached 5.60 today, highest point of the
winter, Fair to good lambs sell at 8.15
to 8.50, some inferior lambs from the
pea feeding district of Colorado last
we

Foodstuffs Hit Top Prices Following Big Washouts

The prevalence of storms in California combined with the severing of discommination between salt Lake and more domain. The control of the station for shipment. In the annual meeting of the shade of th

morning: "We are beginning to realize that the washing out of the San Pedro road is a calamity to Salt Lake, which will become more apparent as time goes on. If it is to cost more to ship in from southern Califonria, why prices will have to be arranged to correspond, which will of course work a hardship." Two cars of oranges arrived last night, the first shipment of the kind since New Year's, thus relieving a market practically bare of this wholesome fruit. A car of sweet potatoes is also included in the general shipments from the coast. Among the eastern receipts are Cuban tomatoes, made more accessible to this country by the building of the Florida Keys railroad, and making possible establishment of regular shipments of produce from the once "ever faithful isle" to any part of the United States. But until the San Pedro relocates its destroyed line, and reopens communication between southern California and Utah, the local consuming public must accommodate itself to largely reduced supplies of winter greenstuffs.

There is likely to be an increased demand for Nebraska flour, as local dealers say that per hundredweight, the eastern flour will yield 20 more loaves of bread than the average Utah article. There is a heavy trade in Nebraska flour here already. The butter situation continues unchanged, except that the local consumption of oleomargarine is increasing with such rapidity that dealers say they are having a hard time to supply the demand. The ward stores are beginnig to cut down their butter orders and increase their oleo stocks, in consequence, as people evince no more readlness to pay 45 cents for 14½ ounces of genuine butter than at first. Halibut is scarce, owing to storms off the Pacific coast, which send the fish out into deep water for the time being. Consequently there is a raise in the price until the supply becomes more plentiful. Eggs are up to the 50-cent mark, with selects even higher. The prices obtaining today in the local markets are as follows:

RETAIL. FLOUR, GRAIN AND HAY.

MEATS AND POULTRY. Dressed beef, per pound . 7@2
Dressed hens, pound . 18@229,
Lard, pound . 12½ @2
Fall lamb, pound . 8@2

NO TROUBLE WITH ROADS.

According to Manager R. H. Strickland of the Utah Mines coalition no
trouble is being met with in the roads
up Big Cottonwood canyon. He declares that they have been as good
this year as any other. At the mine
the tunnel has gone through the ora
recently encountered in the tunnel for
a distance of 75 feet. This is believed
to be the Oregon vein. The ore body
is opening up nicely and Mr. Strick
land believes that a large ore body will
be encountered about 75 feet further.
This will cut a large vein of ore for
which the company has been seeking.

Amalgamated properties to the new company.

The Amalgamated Copper company will take the pay for its properties in the shares of the new organization, and thus it will have complete control of the new concern.

By buying the properties of the different companies the old companies will be wiped out entirely and the entire group of Cole-Ryan and Amalgamated properties centered in one large copper-producing company.

The idea of offering cash or stock in payment for the operating concerns is to avoid any objection which minority shareholders may offer to the plan.

minority snareholders may other to the plan.

The above plan may not be adopted but it seems to be the most likely one at the moment. John D. Ryan is on his way east from Butte and has not as yet considered the plan, but it may be put through without his consent should he object.

NO TROUBLE WITH ROADS.
